

# KLCSRA

## KLC Stats Recording App

An admin-only screen for recording a KLC match — football, rugby or a variation — the clubs, who played, the score, and every player's stats. It totals each player's **Kroopies** and **MMG points**, hands you a copy-ready report, keeps the season tables, and feeds the balance sheets — all fixed in-app.

**Who:** Admins only

**Sports:** Football · Rugby · Variation

**Per player:** 13-stat popup → KR + MMG

**Feeds:** Balance sheets + MMG

**Finalised:** Submit & lock

### THE UNIT OF WORK — ONE RECORDED MATCH

**Kraken  
Leviathans**

**2 – 1**

FOOTBALL · 60 MIN · SAT 9 AUG  
2026

**Rusty  
Rabonas**

**Draft proposal · mockups, not final UI**

Revised to the KFANDRA spec sheet + follow-ups (points/KR payouts, combined matches, Submit & lock). Screens are wireframe mockups in the app's house style; real crests, names & players are used in-app.

Version 0.3 · 10 Aug 2026  
Example match & figures are illustrative

# What it is, at a glance

## OVERVIEW

### THE PROBLEM TODAY

Match details live in people's heads and scattered messages. Turning them into website updates, MMG points and balance-sheet numbers means re-typing everything by hand — and tallying every stat manually.

### WHAT KLCSRA DOES

One admin records the match once — sport, clubs, squads and every player's stats. The app totals each player's **KR & MMG**, produces a report to copy out, keeps season tables, feeds the balance sheets, then **locks on Submit**.

### WHAT GETS CAPTURED PER MATCH

#### Sport

Football, Rugby, or a Variation. Drives which stats appear.

#### Date & duration

Match date; duration typed in minutes.

#### Two clubs + venue role

Each side a club, tagged Home / Away / Neutral.

#### Score per team

Final score entered as a number per side.

#### Up to 6 players / side

Picked as "J. Karanth". Empty slots blank. Grows to 11 + subs later.

#### Per-player stats

A tap-to-add popup of 13 stats, each paying KR + MMG.

### THREE THINGS IT PRODUCES

- **Copy-ready match report** for the website.
- **Season tables** — leaderboards + standings (auto).
- **Per-player KR & MMG totals** — KR fills the balance sheet; MMG shown to copy into MMG.

### FIXED IN-APP · PLAYERS DO NOTHING

Every payout, result and standing is computed by the app from what's recorded. Managers/players don't re-enter anything; once you **Submit**, the match locks (only coach+ can reopen).

**Access:** KLCSRA sits inside the existing **Admin** area (staff only), next to the Club Balance Sheet review. Managers and players never see it — though an admin can hand a Manager the device to fill the live match; they still can't edit a submitted one.

# Recording a match

Your stacked mobile layout — one scrolling screen, Home block then Away block, autosaving as you go, with a **Submit** at the bottom that finalises and locks the match. Example: a low-turnout day, so lower slots are empty.

### HOW AN ADMIN FILLS IT IN

- 1 Date, sport & duration**  
Pick date, tap the sport, type the minutes.
- 2 The two clubs + role**  
A club per side, each tagged Home / Away / Neutral.
- 3 Score per side**  
Enter each team's final score (a number — independent of the tallies, so rugby works).
- 4 Squads — up to 6 each**  
Fill slots from the member list. Leave unused slots empty.
- 5 Each player's stats**  
Tap **Stats** → the popup (next page). The button shows a live tally, e.g. **G1 · Ass1**.
- 6 Submit & lock**  
Finalises the match, computes all KR/MMG, and makes it read-only. Only **coach / super-admin** can reopen.

**Autosave, then Submit.** Every edit saves as you go (offline-safe) so nothing's lost mid-match. **Submit** is the deliberate lock — a helper Manager can fill the live match but can't touch a submitted one.

# The per-player stats popup

Tap a stat to record it against that player — tap again to add another (a hat-trick is three taps → **G3**). Each stat carries a Kroopies & MMG value, so the app totals the payout automatically.

## POPUP FOR ONE PLAYER — FOOTBALL SELECTED

J. Karanth — Kraken Leviathans

Tap a stat to add · tap a count to undo

RC Red0+

LC Late Ch.0+

OA Own Ast0+

Try & Tackle hidden — football

Done

**Done** closes this player's popup. It is **not** Submit — the match-level **Submit & lock** lives at the bottom of the recorder.

## SPORT-AWARE — THE POPUP ADAPTS

- **Football:** Goals, Ass., PA, **Save**, YC, RC, BC, LC, OG, OA, OPA
- **Rugby:** Try's, Tackle, Ass., PA, YC, RC, BC, LC
- **Variation:** all stats

Which stats show per sport is editable in config.

### Answering your sheet directly

Yes to both questions on the sheet: a **tap-to-add popup works** (no separate dropdown per stat), and it **records more than one event** — 2 goals, 3 goals, however many. Live counts, undo, and the payout totals itself.

# Points, payouts & standings

THE RULES · ALL CONFIGURABLE

Every number here lives in config (admin-editable), reusing the app's existing MMG points table. These are the agreed starting values.

## PER-STAT PAYOUT — KROOPIES (KR) & MMG POINTS

| STAT           | KR  | MMG   |
|----------------|-----|-------|
| Goal           | 20  | 500   |
| Try            | 25  | 500   |
| Assist         | 10  | 200   |
| Pre-Assist     | 5   | 100   |
| Tackle         | 5   | 100   |
| Save           | 5   | 200   |
| Yellow Card    | -10 | -200  |
| Red Card       | -20 | -500  |
| Blue Card      | -30 | -1000 |
| Late Challenge | -5  | -100  |
| Own Goal       | -20 | -500  |
| Own Assist     | -10 | -200  |
| Own Pre-Assist | -5  | -100  |

KR fills each player's loanee amount on their club's balance sheet; MMG is totalled per player to copy into MMG.

## LEAGUE STANDINGS POINTS

**By match size** (total players in the match):

- **6 or more players:** Win **3** · Draw **1** · Loss **0**
- **Fewer than 6:** Win **0.2** · Draw **0.05** · Loss **0**

**Margin bonus:** win by  $\geq 20 \rightarrow +1$  to the winner,  $-1$  to the loser.

## COMBINED MATCH (TWO HALVES)

Two sides carry across the halves; each half is a normal 1-v-1. Half-win = **0.2**; aggregate-score winner = **+0.1** to both its clubs.

Example: KL+BOCI vs DP+SOG — H1 KL beat DP, H2 SOG beat BOCI, KL+BOCI won on aggregate:

| CLUB | HALF | AGG. | TOTAL      |
|------|------|------|------------|
| KL   | 0.2  | 0.1  | <b>0.3</b> |
| BOCI | —    | 0.1  | <b>0.1</b> |
| SOG  | 0.2  | —    | <b>0.2</b> |
| DP   | —    | —    | <b>0</b>   |

# What you get out

Copy-ready text and always-current season tables — including each player's totalled KR & MMG.

PER-MATCH REPORT — ONE TAP TO COPY

Kraken Leviathans 2 – 1 Rusty Rabonas

Football · 60 min · Sat 9 Aug 2026

KRAKEN LEVIATHANS (Home)

J. Karanth 1G 1A +30 / 700

P. Gurhani 1G +20 / 500

L. Sharma 1YC -10 / -200

RUSTY RABONAS (Away)

A. Sawant 1G +20 / 500

N. Sarda 1A +10 / 200

Copy report

Exact wording is easy to tune. Each line: player · stats · **+KR / MMG** for the match.

SEASON LEADERBOARDS — AUTO

| TOP SCORERS | G | T | ASS | PA |
|-------------|---|---|-----|----|
| J. Karanth  | 7 | 0 | 2   | 1  |
| A. Sawant   | 5 | 0 | 1   | 0  |
| P. Gurhani  | 4 | 0 | 1   | 0  |

Plus a discipline table (YC/RC/BC/LC), own-goals, saves/tackles, and KR & MMG leaderboards — every stat is per-player.

LEAGUE STANDINGS — PF / PA / PDIFF

| CLUB              | P | W | D | L | PF | PA | PDIFF | PTS |
|-------------------|---|---|---|---|----|----|-------|-----|
| Kraken Leviathans | 5 | 4 | 1 | 0 | 14 | 5  | +9    | 13  |
| Rusty Rabonas     | 5 | 2 | 1 | 2 | 11 | 9  | +2    | 7   |
| Paper Tigers      | 5 | 2 | 0 | 3 | 8  | 10 | -2    | 6   |

**PF/PA/PDIFF** = Points For / Against / Difference (renamed from GF/GA/GD). Pts uses the size-tiered rule + margin bonus.

# How it feeds the Club Balance Sheets

Recording & submitting a match fills each club's balance entry for that date — results **and** the KR each player earned. One-way (recorder → sheet); the Manager is left with only the Club Bonus.

## A CLUB'S BALANCE SHEET FOR THE MATCH DATE — BEFORE VS AFTER

BEFORE · manager types everything

7 Club Bonus

edit ▾

### Fixed in-app — players do nothing

Results (played/W/D/L from the score) **and** each player's **KR** land automatically on the club's dated entry, then lock on Submit. Managers no longer type loanee amounts.

### What the Manager still owns

- **Club Bonus** — the one field the recorder doesn't set.
- That's it — everything else is match-derived.

### SAFE BY DESIGN

- **One-way:** recorder → sheet.
- **Locks on Submit:** no edits after, unless coach+ reopens.
- **Always in step:** the sheet can't disagree with the match.

### MMG SIDE

MMG points per player are **totalled and shown to copy** into the MMG system (which already has its own points table). Direct MMG write-back can come later if you want it.

# Scope, decisions & what's next

FOR SIGN-OFF

## EVERYTHING DECIDED

|                |                                                                                                                                                       |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| Who / where    | Admins only, in the Admin area, at <b>/admin/klc/matches</b> .                                                                                        |
| Sports         | Football, Rugby, Variation — drives the stat popup.                                                                                                   |
| Match setup    | Date, duration (typed min), two clubs each Home/Away/Neutral, score entered per team.                                                                 |
| Squads         | Up to 6/side (→11+subs later), players as "initial + surname".                                                                                        |
| Stats          | 13-stat tap-to-add popup (multi-event, undo), filtered by sport, each paying KR + MMG.                                                                |
| Standings      | PF/PA/PDIFF columns. Size-tiered points ( $\geq 6 \rightarrow 3/1/0$ , $< 6 \rightarrow 0.2/0.05/0$ ) + $\geq 20$ -margin $\pm 1$ . All configurable. |
| Combined match | Two halves; 0.2 per half-win, +0.1 to the aggregate winner's clubs.                                                                                   |
| KR → balance   | Each player's KR auto-fills their loanee amount for the club they played; locks on Submit.                                                            |
| MMG            | Totalled per player, shown to copy into MMG (auto-write later, optional).                                                                             |
| Finalise       | Per-match <b>Submit &amp; lock</b> ; only coach/super-admin can reopen.                                                                               |

### MINOR CONFIRMATIONS (WON'T BLOCK BUILD)

- Exact **website report** wording.
- The **sport → stat** lists (Save in football, Try/Tackle in rugby).
- KR unit into the loanee row — final KR vs pre-rate share.

### SIZED FOR LATER

- **6 → 11-a-side + subs** — slots scale.
- **New stats / sports / rates** — all in config.
- **Direct MMG write-back** — a later phase.

## WHAT HAPPENS AFTER SIGN-OFF

### 1 • Data model

Match / half / side / appearance / stat tables + KR & MMG rate config, reusing clubs, players & the MMG points table.

### 2 • Build & test

Recorder + stats popup, Submit/lock, payouts, reports, season tables, balance-sheet link — tests first.

### 3 • Try on real matches

Record live KLC games, compare to the sheets/website, refine.

**Green-lit.** KLCSRA records a football or rugby match once — clubs, squads, every player's stats — totals the Kroopies & MMG, writes the website report and season tables, feeds the balance sheets, and locks on Submit. Built by an admin, in the app you already have.
