KLC League Guide

How to use the **KLC League** section of the app: tables, results, leaders, and recording matches. No technical knowledge needed.

> **In one line:** club managers record their own club's teams, KFANDRA makes matches official, the app works out the league points automatically, and every player can see the tables, results and leaderboards.

1. Finding it — everyone

- On the home screen, tap **KLC League** (under Club Balance Sheet).
- Club managers and KFANDRA also see a **Record a match** link just below it.

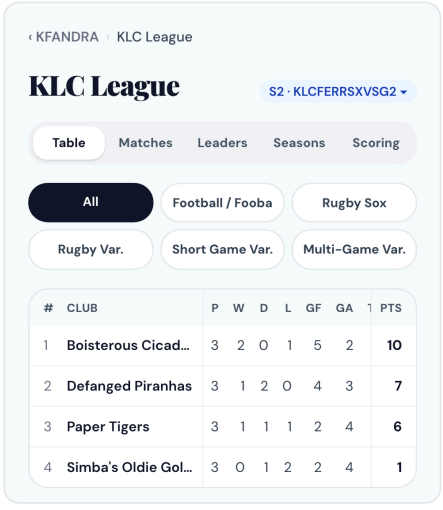

At the top of the KLC League page:

- **The season pill** (e.g. `S2 · KLCFERRSXVSG2 ▾`). Tap it to switch season. It opens on the season that's running.
- **Five tabs:** Table · Matches · Leaders · Seasons · Scoring.

2. Table — everyone

Pick a table with the buttons under the tabs (all six are always visible):

- **All**: every official match, combined
- **Football / Fooba**
- **Rugby Sox**
- **Rugby Var.** (Rugby Variations)
- **Short Game Var.** (Football Short Game Variations)
- **Multi-Game Var.** (KLC's Multi-Game Variations)

On a phone, **swipe the middle columns** sideways. The club name and points stay put.

Column	Meaning
P · W · D · L	Played, won, drawn, lost
GF · GA	Goals for and against (Football, Fooba, Short Game)
TF · TA	Tries for and against (Rugby Sox, Rugby Variations)
Diff	(goals + tries for) minus (goals + tries against)
Pts	League points

Order: most points first. Ties are broken by Diff, then by goals + tries scored, then by club name.

3. Matches — everyone

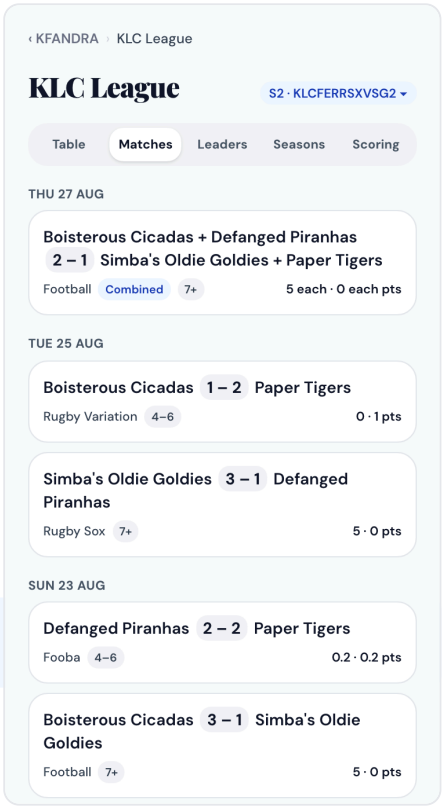

The Matches tab lists every **official** league match in the season, newest first, grouped by date. Each card shows:

- the clubs and the score
- the match type
- the player-count tier: **7+**, **4–6** or **2–3**
- the points each side earned

A **Combined** (joint-manager) match lists both clubs on each side and shows "each": every club on the winning side gets the full points.

Tap a match to see its full record (squads and stats), read-only.

> Friendlies don't appear here and earn no league points.

4. Leaders — everyone

The top 10 for the season on each board:

- **Goals** (includes Fooba main and rebound goals)
- **Tries** (includes Rugby Sox conversions)
- **Assists** and **Pre-assists**
- **Saves**

- **Tackles**
- **Discipline** (yellow, red and blue cards, plus late challenges)
- **Kroopies**
- **MMG**

The same chips as the Table tab filter by match type. Each player shows the club they played for most recently. Only **MMG** also counts friendlies. Players with tied totals share a rank.

5. Seasons and Scoring — everyone

- **Seasons** lists every season with its status (Active, Upcoming, Closed) and dates. Tap one to see its tables.
- **Scoring** shows the points scale the app is using right now (below).

6. How points are worked out

Points depend on the match type and the number of players, **counting both teams together**.

Win	7+ players	4–6 players	2–3 players
Football / Fooba	5	1	0.5
Rugby Sox	5	1	0.5
Rugby Variation	3	1	0.5
Short Game Variation	3	1	0.5
Multi-Game Variation	3	1	0.5
Draw (all types)	1	0.2	0.1
Loss	0	0	0

- **Combined (joint-manager) match:** one result on the total score across both halves. Every club on the winning side gets the full win points. On a draw, each club gets the draw points.
- **Session limits** (at most 3 matches at 4–6 players, at most 2 at 2–3 players) are a ground rule. The app doesn't enforce them.
- Points are always worked out again from the recorded score, so **correcting a match updates every table automatically**.

7. Recording a match — club managers

Each club enters **its own team** on **one shared match**. Managers don't see the score of a league match until it's **Official**: the recorder shows "? – ?" and the Matches list shows "vs". KFANDRA enters the score.

1. On the home screen, tap **Record a match**.
2. Under **New match**:
   - Set the date and the match type.
   - Your club is the home side. Pick the **Opponent** (you can't tap **+ New match** until you do).
   - Tick **Combined** for a joint-manager match (two halves), and/or **Friendly**.
   - Tap **+ New match**.
3. **Already recorded?** If the other club has already started this match, the app says so and offers **Open it**. Open it and add your team there, so the match is only entered once.
4. In the recorder, add **your team's** players and tap a player to record their stats. Everything saves as you go. You can see the other team, but not change it.
5. In league Fooba and Rugby Sox matches, you can type each goal's or try's **minute** (from the referee) for your own team before sending. It's optional. Fooba main and rebound goals and Rugby Sox tries have a minute box.
6. Check the **Before sending** list, then tap **Send my team**.
7. A match shows its status:
   - **Draft**: nobody has sent yet.
   - **Draft · 1 of 2 teams sent**: one team is in, waiting for the other.
   - **Waiting for KFANDRA**: both teams are sent (league match).
   - **Official**: KFANDRA has made the league match official.
   - **Submitted**: a friendly, which is submitted as soon as both teams are sent.

Saves: record a save only when it's a proper save: a shot on target, or a save that stops a clear goal-scoring chance.

Conversions (Rugby Sox) count like a try, at the try's rate.

Friendlies

Either manager enters the score of a friendly, before the first team is sent. A friendly earns no league points and no Kroopies, but counts towards MMG. If you switch a match between **League** and **Friendly**, any score already entered is cleared.

Rules the recorder checks for you

- **Your own team only:** you add and edit your own club's players and stats.
- **Keep your own club on the match:** a manager can't remove their last club from it.
- **Clubs stay with their pair:** in a combined match, a club can't be on both sides. Clubs that aren't allowed are greyed out. To swap sides, ask KFANDRA or an admin.
- **After sending:** once either team is sent, the match details and each side's clubs are fixed, and a sent team can't be changed. Ask **KFANDRA** to send the match back.
- **Official needs an active season:** a league match can only be made official while a season is active. Until KFANDRA starts the season, record friendlies, or keep league matches as drafts.

7a. Making a match official — KFANDRA and admins

1. **Record a match** lists **Waiting for KFANDRA** first.
2. Open the match. You can change anything: clubs, players, stats, times.
3. Enter the **official score**. Next to it, **Recorded goals** shows what the managers recorded. If the two differ, it turns amber. **Your score is used.**
4. Tap **Make official**. The match locks and counts in the tables.
5. Something wrong? Tap **Send back to managers** instead. Both teams can edit again.
6. **Goal and try times** can be added at any time, even after a match is Official, without reopening it.
7. **Reopen** an official match to correct it: a league match goes back to **Waiting for KFANDRA**; a friendly goes back to **Draft**.

8. Running the season — KFANDRA

- **Start a season:** go to Admin → KLC → Seasons and tap **Start**.
  - Only one season runs at a time.
  - Starting a new season closes the old one.
- **Close a season:** tap **Close** when it ends.
  - It's refused while unfinished matches (draft or waiting for KFANDRA) dated in that season are still open.
  - Make them official or delete them first.
- **Which season a match counts for:** the season that's **active when it's made official**.

- **Reopen:** only KFANDRA can reopen an official match. A league match goes back to **Waiting for KFANDRA**; a friendly goes back to draft.
- **Staff** (KFANDRA and admins) can record and edit any club's match.

> If an old match is reopened after the next season has started, making it official again moves it into the new season. Where possible, fix old matches before starting the next season.

9. Quick answers

Question	Answer
My match isn't in the table.	It's either still a **draft** or **waiting for KFANDRA** (not official yet), marked **Friendly**, or a different match type from the chip you picked. Try **All**.
Can players see drafts?	No. Only official matches appear for everyone. A draft or a match waiting for KFANDRA is visible only to the clubs involved and staff.
Why did a 6 v 6 game count as 7+?	Players are counted across both teams: 6 + 6 = 12.
Where is Season 1?	Season 1 stays on Coach's sheet. It used older scoring rules, so it isn't re-scored in the app.
Who decides the points scale?	KFANDRA. The Scoring tab always shows the scale the app is using.
